Product Spotlight: UB Series Shot Pins

For over two decades Welker has been the leader in producing lubrication-free shot pins for diverse markets and industries. Today, Welker has over 1,000,000 units in production around the globe. The UB series shot pins are by far the most popular for their simple integrated design, accuracy and repeatability. They also provide the lowest cost of ownership and operation.

The UB series includes the UB2, with 24mm square ram, and the 40mm square ram UB4. They are available in 25, 50, and 75mm stroke lengths, with standard NAAMS compatible base mounting pattern. Anti-rotate ram enables the shot pins to handle offset loads, carrying multiple locators and backups. A variety hole patterns are offered for mounting tool. Ram is electrically insulated from the body and resistant to corrosion and weld spatter. Units are equipped with safety orange steel shrouds to withstand harsh environments.

Applications for the UB shot pins include retractable locating pin, straight acting clamp, part stop, probe slide and wedge lock.

Sales Spotlight: Prime Systems Network

Welker is represented in Ohio, West Virginia, Kentucky and Western Pennsylvania by Ralph McAllister, Ryan McAllister, and Dave Burkhardt of Prime Systems Network Inc. They have been a part of the Welker Sales Team since 2009 and bring over 25 years of manufacturing solution experience to the table. Stop by the Welker booth at Fabtech to say hello or contact them

New Product Release: Auto-Indexing Dimpler

The Welker Auto-Indexing Dimpler protects dies by minimizing potential for multiple blank feeds in stamping operations. It prevents sheet metal blanks from sticking together by producing a pattern of small dimples in the trim edge that automatically index with the action of the press. Suitable for aluminum, or cold/hot-rolled steels, the unit requires no air, hydraulic or electrical connections. The Dimpler can also improve plant safety by correcting the fan-stack effect on tailor-welded blanks. [Click here](#) for more info.

Upcoming Trade Shows

Welker will be at Fabtech in Chicago, November 18-21, booth #N2871. Check out our new products and say hello!
