Product Spotlight: Ground Block Cylinder Improves Weld Quality

Sales Spotlight: Welker Customer Service Team

Application Spotlight: "Gigantic" Part Positioners

Product Spotlight Ground Block Cylinder

The GB3 offers a cost advantage over machined backups/ground blocks for MIG and arc welding applications. Pneumatically actuated and electrically insulated, the unit produces a consistent ground even after significant electrode wear. Weld consistency is improved. Commutator grounds are eliminated on trunnions. Available in four retract stroke lengths to allow easy part removal or transfer. The GB3 features a lube-free design, double seals, and bi-directional mounting. For more info and videos visit <http://www.welkerproducts.com/groundblock.php>

Sales Spotlight: Welker's Customer Service Team

Meet Janice, Emily, Barbara, Kim and Brenna of the Welker Customer Service Team! Our friendly and dedicated team responds quickly to online and phone inquiries. With over seventy-five years of combined experience they can provide the skilled guidance needed for our highly technical product line. Wearing multiple hats, Janice is also the Office Manager.

Application Spotlight: Gigantic Part Positioners

150mm bore cylinders are featured on these "gigantic" part positioners, supplying up to 1600 lbf clamping force at 80 PSI. The LST positioners locate, clamp, and act as a
