

ROTA-FLEX ROTARY INDEXER

SELF-LOCATING 30° INDEX

HORIZONTAL OR
VERTICAL
APPLICATION

Rota-Flex is a positive locking mechanical indexer ideal for manual trunnions, dial tables and flexible assembly pallet change over.

*Provides low cost, secure, repeatable positioning in 30° increments.
Consult factory for other increment options.*

Spring loaded, self-locking mechanism provides positioning with minimal backlash.

Actuation options include: robot, manual tool, pneumatic foot pedal or hand button.

Tested for longevity and repeatability for 4.5 million indexes.
